

LUBCON® DuoMax 160

Long-term solution for maintenance free electrical motor operation. The electro-mechanical lubricator eliminates most common bearing failures caused by e.g. over lubrication, under lubrication, contamination or accidental mixing of incompatible lubricants.

- Precise lubrication system with two outlets for maintenance-free operation of modern electric motors
- Optimum grease supply to the bearings due to minimum quantity lubrication over a time period up to three years
- Prevents over lubrication of lubricating points occurring with conventional manual lubrication

LUBCON[®] DuoMax 160

The Smart Electro-Mechanical **Lubrication Unit**

Modern Lubrication Providing **Best Machine Performance** and Reliability

Economical

- long-term lubrication on two lubrication points
- easy installation and activation
- optimal metering of the lubricant
- combination of high-performance lubricants and intelligent lubrication device
- battery driven, no external power needed

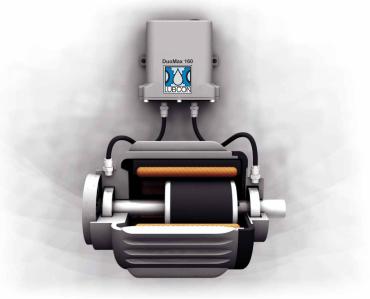

Robust and Reliable

- closed metal housing
- completely sealed unit
- performs in extreme environmental conditions (dust, water, heat)
- installation in any position
- resistant to shock and vibration

Lubrication Over Long Periods

- individually adjustable operating time
- possible operating range up to 36 months
- lubrication device for minimum quantities e. g. at 3 years operating time: 26.6 cm³ per year and outlet

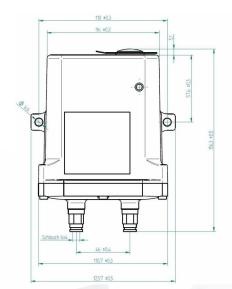

Technical Data	DuoMax 160
Lubricant Volume	160 cm³ (2 x 80 cm³)
Feed rate	0,08 cm³/stroke
Operating time	individual, up to 36 months
Suitable lubricants	oils, greases up to NLGI class 2
Dimensions (h x w x d)	152 mm x 110 mm x 64.5 mm (5.9" x 4.3" x 2.5")
Fitting	G 1/8"
Housing material	aluminium die-cast
Maximum length of tube	1.5 m (4.9 ft)
Recommended tube diameter	6 mm (outer diameter) 4 mm (inner diameter)
Ambient operating temperature	-20 °C*) up to + 70 °C -4 °F bis 158 °F
Maximum feed pressure	8 bar / 116 psi
Protection class	IP68
Drive	electro-mechanical
Weight without lubricant	800 g / 28.22 oz

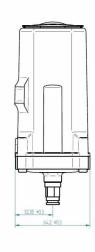

LUBCON Lubrication Systems

The **DuoMax 160** is an electro-mechanical lubricator for automatic lubrication on two lubrication points with grease or oil. The aluminium body of the DuoMax 160 contains two sealed and unpressurized cartridges filled with 160 cm³ lubricant. Two progressive advancing pistons push the lubricant through two outlets to the lubrication points. The forward motion of the pistons is generated by a geared motor and a spindle drive.

The control of this motion and the activation and control of the gear motor is done by a micro processor. A fixed, non-removable lithium battery supplies the electronic circuit and the motor with energy. The maximum operating time of the **DuoMax 160** is 3 years.

Release date: 2016-03-16
